#### **DETAILED ACTION**

## Response to Amendment

1. This Office Action is in response to Applicant's Amendment dated January 5, 2006 in response to USPTO Final Office Action dated October 5, 2005.

The cancellation of claims 8-9 and 16-24, and the amendments to claims 7, 10 and 11 are sufficient to place the application in a condition for allowance as set forth hereinbelow.

## Allowable Subject Matter

- 2. Claim 1-7, 10-15 and 25-33 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

Relative to claim 1, the major difference between the teachings of the prior art of record (USP 5,80, 540, Furuhashi et al. and USP 5,420,578, Michel) and that of the instant invention is that said prior art of record **does not teach** a bus compressing apparatus comprising at least two voltage control means connected to the corresponding bit lines, wherein each voltage control means changes the voltage level of the bit line at a different ratio from the other voltage control means.

Regarding claim 7, the major difference between the teachings of the said prior art of record and that of the instant invention is that said prior art of record does not teach a bus decompressing apparatus comprising receiving means for receiving an analog signal formed by compressing at least n-bit data, wherein n is an integer, and wherein the analog signal included a range of possible unique voltage levels, each unique voltage level corresponding to an n-bit

value; quantizing means for quantizing the analog signal from the receiving means, wherein the quantizing means includes at least (2 to the n power -1) level detectors, and wherein each one of the level detectors includes a transistor controlled by the analog signal, and output voltage control means connected to the transistor to output the quantized analog signal to the coding means in response to the analog signal; and coding means connected to the quantizing means for coding the quantized analog signal to reconstruct the n-bit data.

Relative to claim 25, the major difference between the teachings of the said prior art of record and that of the instant invention is that said prior art of record does not teach a bus compressing apparatus for use in interfacing a controller and a display device for compressing n output signals of the controller, the bus compressing apparatus comprising: n voltage converters coupled to the corresponding output signals, wherein n is an integer and each voltage converter changes a voltage level of the corresponding output signal, and outputs of the n voltage converters are connected to produce a combined output signal in response to voltage levels of the n output signals from the controller, and wherein the combined output signal has a plurality of voltage levels representing nth power of the number of output signals.

Relative to claim 29, the major difference between the teachings of the prior art of record and that of the instant invention is that said prior art of record **does not teach** a bus decompressing apparatus comprising a coding device connected to a plurality of level detectors to code quantized signals to reconstruct an n-bit data.

# Response to Applicant's Remarks

4. Consistent with Applicant's remarks, the amendment to claim 7 incorporating the allowable limitation of cancelled claim 9 is sufficient to make claim 7 and related dependent claims allowable.

#### Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U. S. Patent No.	6,064,771	Migdal et al.
U. S. Patent No.	5,883,925	Sinibaldi et al.
U.S. Patent No.	4 951 139	Hamnilton et al

To Respond

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vincent E. Kovalick whose telephone number is 571-272-7669.

The examiner can normally be reached on Monday-Thursday 7:30- 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Bipin Shalwala can be reached on 571-272-7681. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
